Software Developer & Architect

About Me

I am a **Software Developer** and **published author** based in London, specializing in AI technologies and solutions. With over 20 years of experience in web development, my journey began with HTML and CSS in 2003, quickly advancing to PHP and MySQL by 2006. Over the years, I have evolved from building websites to developing sophisticated software solutions, culminating in my current focus on the AI, Web3 and ecommerce space. I authored and published **Blackbook Protocol**, a UK founder asset-architecture book (hardback, Kindle, audio, eBook and templates).

I'm experienced in **PHP**, **JavaScript**, **TypeScript**, **Python**, and frameworks such as: **Docker**, **Web3JS**, **React**, **Next.js**, **Remix / React Router**, and **Node.js**. My current focus areas include **Shopify apps**, **API integrations**, **MCP / AI agents**, **Blockchain**, and **AI/ML**.

Contact Information:

- **Location:** South West London, UK
- **Email:** hi@koynlabs.com
- **X:** X

Current Interests:

- **Interested in:** AI agent development, Shopify / ecommerce, Blockchain Web3, and MCP tooling
- **Currently building:** LABS, LEVERCOIN, ARTIFY, PRICEY, PLOTT, and Blackbook Protocol (author / publisher)
- **Looking to collaborate on:** AI projects, Shopify apps & Web3 projects
- **Reach me on:** Telegram

Professional Experience:

KOYN ($KOYN)

September 2026 - present
- Solana Dex launched, with trading fees converted to xSOL (Hylo's leveraged SOL token) and sent to holders automatically. - Official site is an interactive "truth-terminal" (type help, buy, trade) with its own trading desk. - DEX screener for StonkFun, pump.fun and wider Solana markets, with source, curve and paired-with filters, live prices and Jupiter-routed swaps from the user's own wallet. - Next.js on Vercel, Solana, Jupiter. - KOYN - Trade

LABS (MCP Launchpad)

September 2026 - present
- MCP server that lets Claude, ChatGPT, Grok or Cursor launch Solana tokens on pump.fun or StonkFun and announce them on X, all from one conversation. - Builds the metadata, create transaction and opening buys from up to three user wallets in one atomic Jito bundle, then hands back a signing link. It never touches private keys, and there's no launch fee. - Trading tools: Jupiter-routed market, limit, stop, take-profit and DCA orders, SOL / ETH / BTC perps, a disclosed two-sided maker, and live pump.fun and StonkFun trading pairs. - X integration: per-user OAuth 2.0 (PKCE) connect with a personal API key, AES-GCM sealed tokens, chunked image and MP4 uploads, prepare-then-confirm posting, and a signed Account Activity webhook for capped mention replies. - Next.js on Vercel (Streamable HTTP MCP), Upstash Redis, Solana web3.js, Jito, Jupiter, X API v2. - LABS - GitHub

Blackbook Protocol (Author & Publisher)

July 2026 - present
- Authored and published **Blackbook Protocol**, a UK educational blueprint for founder asset architecture: Engine & Vault, 95/5 ownership, HMRC TRS (Shield), and Companies House PSC. - Released as hardback, Kindle, audio, eBook and templates via KOYNLABS; sold on Shopify and Amazon. - Built the Shopify storefront plus a purchaser-gated Protocol Advisor MCP so buyers can use Claude, ChatGPT, or Cursor against the book corpus after verifying a book order (Shopify Admin + email OTP). - Cited book search, module playbooks, FAQ knowledge base, and optional assisted filing on official portals (confirm-on-submit; educational guidance, not legal or tax advice). - Horizon theme (monochrome brand system), Klaviyo campaign and flow tooling, Vercel-hosted MCP (Streamable HTTP + SSE), Neon, Resend. - Blackbook Protocol - Amazon Kindle - Protocol MCP

PRICEY (Shopify App)

May 2026 - present
- Standalone Shopify app in the Artify ecosystem that recommends catalog prices from Instagram follower demographics and purchasing power. - Merchants sync tagged products, map them to artists, preview AI prices, and apply them to Shopify variants via Admin API. - Audience base prices plus print / canvas / original and size multipliers at apply time. - Native Shopify UCP catalog: PRICEY-managed prices flow into agent-commerce readiness without a separate checkout layer. - Paid-order webhooks power an ROI dashboard (attributed revenue, price impact vs previous Shopify price, estimated margin). - Shopify App Home (React Router + Polaris + App Bridge), Prisma, Gemini / Gemma, Instagram Business Login + Insights, World Bank GNI for purchasing power. - PRICEY

PLOTT

April 2026 - present
- A multi-tenant SaaS for UK construction firms. Turns open planning applications into signed contracts via a 3D map, applicant enrichment, branded letter generation and saved-search email digests. - Next.js 16 (App Router, React 19, Server Components) - Prisma 6 + Neon Postgres - Neon Auth (session cookies + hosted UI) - Stripe (three-tier subscription + billing portal + webhooks) - Vercel Blob (logos, uploaded signatures, generated PDFs) - Google Maps Platform (photorealistic 3D tiles, Street View fallback) - Resend + React Email for transactional mail - Upstash Redis for rate limiting - Vercel AI SDK + AI Gateway (multi-provider LLM routing) - Vitest + Playwright for tests - PLOTT

ARTIFY (Shopify App)

October 2025 - present
- Shopify app that turns customer photos into AI-generated art, then sells framed prints worldwide. - Originally built in 2019 on Laravel; rebuilt as an embedded Shopify Remix / React Router app with a theme App Proxy storefront. - Dual-stream pipeline: fast preview, then 300 DPI print files on paid orders, fulfilled via worldwide. - 3D room visualizer (Three.js) for an immersive shopping experience; artist style marketplace with commission on each use. - Artist onboarding (Instagram), Stripe / Shopify Collective payouts, credits, cart pairing, and native Shopify UCP agent-commerce handoff. - Customers can mint a free NFT as proof of ownership. - Artify Photo - Artify App

KOYNFX

August - September 2025
- Fully agentic trading workspace for modern traders - Built using React frontend and Python API - KOYNFX seamlessly integrates with TradeLocker API - Provides realtime in-depth market analysis for over 100 tradeable instruments including: Stocks, Crypto, Commodities and Indices - Trade autonomously and allow the Agent to manage your account - KOYN FX

Backend Developer - SuperPayments.com

May 2022 - June 2022
- Optimized and refined Magento 2 extensions for Black Friday/Cyber Monday using **PHP**, **Knockout JS**, and **XML**. - Super Payments

Integration Specialist - DMMC NFT Platform

Jan 2021 - May 2021
- Integrated Blockchain and NFT Metadata into Hubspot CRM using **NodeJS**, **PM2**, and **Moralis**. - DMMC

Technologies & Tools

- **Languages:** TypeScript, JavaScript, PHP, Python, SQL
- **Frameworks:** React, Next.js, Remix / React Router, Node.js, Shopify (Polaris, App Bridge, Functions), Magento 1 & 2, Laravel, Web3js, Solana, Metaplex, Moralis
- **AI / Agents:** Gemini, Gemma, MCP, Vercel AI SDK
- **Blockchain:** Solana, Ethereum
- **Databases:** PostgreSQL (Neon), Prisma, MySQL, MongoDB, Firestore
- **DevOps:** GIT, CI/CD, Docker, Vercel
- **Fullstack** | Web3 | AI/ML | Shopify | Cloud Administration | eCommerce

Education

- **BSc in Business & Economics** - Oxford Brookes University & Open University

Previous Experience Magento, Laravel *(Back in the days).*

Backend Developer - Vision Direct

January 2021 - May 2021 - Backend Magento development, including feature development, bug fixes, and upgrades for Magento 1. - **Technologies used:** GIT, PHP7.2, MySQL, XML & JSON, JavaScript - KnockoutJS, Microservices, NodeJS, REST

Kurt Geiger Migration

Aug - Nov 2019 - Led a successful migration from Magento 1 to Magento 2, ensuring seamless transition and improved performance.
- **Technologies used:** GIT, PHP7.2, MySQL, XML & JSON, JavaScript - KnockoutJS, Microservices, NodeJS, REST

Pay360 Extension Rebuild

May - Jun 2019 - Rewrote the Magento 2 extension to work with the latest version, improving functionality and performance.
- **Technologies used:** GIT, PHP7.2, MySQL, XML & JSON, JavaScript - KnockoutJS

IBM - Audi

March 2018 - June 2018
- M2 Transition project through to delivery for Audi.co.uk.
- **Technologies used:** PHP7.0, MySQL, XML & JSON, JavaScript - KnockoutJS, Microservices, Adobe AEM

Condenast for Style.com

July 2016 - December 2016
- Magento Development contract for Style.com M1 Marketplace Extension refactor and M2 Marketplace Extension development.
- **Technologies used:** GIT, PHP7.0, MySQL, XML & JSON, Zend Client

Klarna AB (UK Office)

October 2015 - June 2016
- Magento Development contract for Klarna AB. Merchant integration and customization of the official Klarna Checkout Extension.
- **Technologies used:** GIT, PHP5.6 - 7.0, MySQL, XML & JSON

Starbucks

February 2014 - March 2014
- Frontend Development for Starbucks B2B portal website.
- **Technologies used:** GIT, PHP5.6, MySQL, XML & JSON, Laravel

And countless other startups, SME's and enterprise level builds that I've helped to bugfix and or develop from scratch.

Certifications

- **Magento Certified Developer**
