Software Developer & Architect

About Me

I am a **Software Developer** based in London, specializing in AI technologies and solutions. With over 20 years of experience in web development, my journey began with HTML and CSS in 2003, quickly advancing to PHP and MySQL by 2006. Over the years, I have evolved from building websites to developing sophisticated software solutions, culminating in my current focus on the AI, Web3 and ecommerce space.

I'm experinced in **PHP**, **JavaScript**, **Python**, and frameworks such as: **Docker**, **Web3JS**, **ReactJS**, and **NodeJS**. My current focus areas include **API integrations**, **Blockchain technology**, and **AI/ML**.

Contact Information:

- **Location:** South West London, UK
- **Email:** koynlabs@gmail.com
- **X:** X

Current Interests:

- **Interested in:** AI agent development, Blockchain Web3 development and ecommerce solutions
- **Currently building:** ARTIFY PHOTO
- **Looking to collaborate on:** AI projects & Web3 projects
- **Reach me on:** Telegram

Professional Experience:

PLOTT

Aprol 2026 - present
- A multi-tenant SaaS for UK construction firms. Turns open planning applications into signed contracts via a 3D map, applicant enrichment, branded letter generation and saved-search email digests. - Next.js 16 (App Router, React 19, Server Components) - Prisma 6 + Neon Postgres - Neon Auth (session cookies + hosted UI) - Stripe (three-tier subscription + billing portal + webhooks) - Vercel Blob (logos, uploaded signatures, generated PDFs) - Google Maps Platform (photorealistic 3D tiles, Street View fallback) - Resend + React Email for transactional mail - Upstash Redis for rate limiting - Vercel AI SDK + AI Gateway (multi-provider LLM routing) - Vitest + Playwright for tests - PLOTT

ARTIFY (Shopify App)

October 2025 - present
- Built Artify Photo using React. Originally built in 2019 on Laravel. Check out

the TikTok and Instagram links on the website. - Rebuilt Shopify - Artify pays artists each time their style is used to re-imagine customer photos - Customers can then choose a frame and print - The app includes 3D augmented reality for a imersive shopping experience - Payouts are distributed via Stripe or Shopify Collective - Worldwide fulfillment - Customers can mint a FREE NFT as proof of ownership - Artify Photo - Artify App

KOYNFX

August - September 2025
- Fully Agentic trading workspace for modern traders - Built using REACT frontend and Python API - KOYNFX seamlessesly integrates with TradeLocker API - Provides realtime in-depth market analysis for over 100 tradeable instruments including: Stocks, Crypto, Commodities and Indicies - Trade automonmouly and allow the Agent to manage your account - KOYN FX
